

Suggested Format for Submitting Frequency Data Requests to the Department of Energy

This document provides a suggested format for 1710 – 1755 MHz wireless industry licensees to submit their data requests to the Department of Energy (DOE). Wireless licensees may use alternate formats, but should ensure that they indicate which DOE frequency assignments are being addressed by identifying the National Telecommunications and Information Administration (NTIA) Government Master File (GMS) Agency Serial Number. This is a unique identifier for each frequency assignment and will be in the format “DOE xxxxxx” where the “x’s” will be numbers.

XYZ Wireless Company requests the release of technical performance data related to the following Department of Energy frequency assignments currently operating in the 1710 – 1755 MHz frequency band. Our point of contact is _____. Email address and telephone number are provided below.

Agency Serial Number	Frequency (MHz)	Transmitter Geographic Location	License Name (e.g., AW-BEA057-B)
